

Lab 7 – Deadline: labs 9-10 (same groups of minimum 3)

Themes laboratory:

1. Implementation
2. SVN
3. Team coordination, negotiation

Problem 1 [20 points]

On established themes continue work at the project (**All names will be in English**). Implement the main components of the project so you have a **first functional version**.

The project will be saved on Github/Bitbucket. One person from the team will coordinate the team and will know what the members have done and will make a short presentation of components made by them. Also this person will establish and negotiate points that deserve each team member.
